Socks for diabetics

For diabetics, there is a high risk of diabetic foot ulcers. Here, the nerves and bloodvessels due to diabetes severely damaged.

The solution for healthy feet are Silver stockings. These are made of a silver-containing specialty threads and because of their special processing particularly well suited for the demanding needs of diabetics. It speeds up the healing process and will thus make everyday life a little more pleasant.

LINDNER offers you special medical CE-certified diabetic socks with excellent quality.

Hallux valgus

Due to the deviation of the big toe and the associated emergence of the large toe pads are formed at this point often painful inflammations on the inner edge of the foot , caused by pressure from the upper part of the shoe .

The hallux valgus stockings from LINDNER medical support the conservative treatment and reduce pain in the affected areas.

All socks have a hand linked toe and consequently have no pressure points.

Hallux valgus socks with toebox

This sock is the perfect addition to a treatment with a hallux valgus splint. As an intermediate layer it reduces friction and makes therefore a gentle treatment possible.

Article No.: 14 24 21 22 0002
75% Cotton 20% Polyamide 5% Elastane
Sizes: 35 – 46
Colour: black, light-beige

on stock

Support stockings

Support stockings improve and accelerate the blood circulation. They are used as a prophylactic agent against travel thrombosis and support persons who have to work on their feet for long. Support stockings can not be prescribed and they are only suitable for venous healthy people.

The supporting pressure is regularly checked electronically. All socks have a hand linked toe and a soft waistband and thus generate no pressure points.

LINDNER offers you a wide selection of support stockings in order to meet the individual needs of your customers.

Medical compression stockings – Compression arm sleeves

Compression stockings are used inter alia the treatment of varicose veins, venous Thrombosis or Lymphedema. They are produced in four compression classes (Ccl).The compression ranges from 18 mmHg in Ccl 1 to at least 49 mmHg in Ccl 4.

The compression gradient is electronically controlled. All compression stockings have, if available, a hand linked toe and a soft waistband and thus generate no pressure points.

LINDNER medical offers you medical compression stockings in Ccl 1 to Ccl 3 and compression arm sleeves in Ccl 1 to Ccl 2, in order to satisfy the individual needs of your customers. All socks have the CE mark and are Class 1 Medical Device.
